Corrected Gas Oils Test Plan

Please find attached a corrected version of the Gas Oils Test Plan submitted on November 6, 2003. There were errors in several of the CAS numbers in Appendix A, which have been corrected in this version. These are the only changes to the document.

The Gas Oils Test Plan currently posted on the EPA HPV website should be replaced with this document.

Please do not hesitate to contact me or Tom Gray (202-682-8344) with any questions you may have on this information.

Thanks for your help in posted the corrected test plan,
Lorraine Twerdok
